Javascript

HTML

CSS

Yousef Abdelsalam Fathy

Backend developer

CAREER OBJECTIVE

As a recent graduate with a degree in computer science, I am seeking a backend developer position where I can utilize my technical skills and continue to learn and grow in the field. With my strong foundation in programming languages such as PHP and Java, as well as my experience working on small-scale projects, I am eager to contribute to a team and make a positive impact on the development of web applications.

PROFESSIONAL EXPERIENCE

August 2022 - Present

Backend Developer

Freelancer

As a freelancer backend developer, I developed APIs for the iOS and Android platforms using PHP, Laravel, and MySQL. I also created dashboards for managing the system using open-source HTML templates. I utilized my skills in PHP, Laravel, and MySQL to create a seamless backend system.

Projects

Food Club website ([GitHub](#))

Full-stack Developer

A website for ordering food like Talabat.

I developed the backend using PHP and integrated it with a Firebase database. I also built the website using HTML, CSS, and JavaScript, fully integrated with the backend.

EgyCam Application

Backend Developer

A mobile app on Android & IOS for hiring camera operators and creating marketing materials for special events from EgyCam company.

I developed the APIs for the iOS and Android platforms using PHP, Laravel, and MySQL. I also created the dashboard for managing orders and all other system entities using HTML, CSS, and JavaScript.

Certificates

IEEE (Web Design)

Laracasts Level 8

Military service status

Temporary exemption

Nour Application

Backend Developer

A mobile app on Android & IOS for order products online.

I developed the APIs for the iOS and Android platforms using PHP, Laravel, and MySQL.

Dashboard for Sales products

Fullstack Developer

A dashboard It contains a page for of users table with address and email, a page for products table with their prices, and a page for sales table, which contains the invoice number, date, product name ,,username, and the total invoice according to the product, number, and price of products. With the able to create, delete and edit in all tables on the pages.

I using PHP, Laravel, MySQL, HTML,CSS and JavaScript.
